8621 East Buffalo Street  
Tampa, Florida 33610

Dear Mr. Sowards:

The removal of the top one foot of dirt at those locations in the Morningview Subdivision which previous gamma surveys showed to be elevated from surrounding areas has reduced the gamma readings at those locations to that of the surrounding area according to my most recent survey done on July 18, 1986. The readings at that time were what we consider to be background levels. Care should be taken to insure that any fill used in the future does not add radioactivity.

If you have any questions or if we can be of further assistance, please call.

Sincerely,

James W. Nall  
Public Health Physicist
